

POWERED BY 1FASTBITE

Upgrade your online presence and reach out to more customers by offering them the convenience of online ordering. 1Fastbite can help you.

1Fastbite is a restaurant order management system that enables restaurants to offer their services to customers online. Specifically, through 1Fastbite, restaurants can allow customers to order online for pick up or delivery; as well as make online dine in reservations or catering requests.

Our goal is to make online ordering easily available to restaurants via our cost-effective and customizable solution.

Google it! Big chain restaurants are growing and expanding via sales over the Internet. Some of these restaurants

have reported over \$2 Billion online sales by first half of 2010. Many national chains reported that they have enjoyed over 50% annual growth in online ordering sales in the past nine years. Online sales account for over 25% of their total sales in 2009.

Nielsen-online reports that over 92% of Internet users are comfortable ordering online. The ability for restaurants to receive orders from the web and mobile device is becoming an imperative.

1Fastbite can help your restaurant compete and win online!

With 1Fastbite, your restaurant can expand by reaching out to the online population. You can offer your customers the convenience of ordering online for delivery or pick up; as well as making dine in reservations or catering request.

1Fastbite's customizable user interface allows you to cater your online ordering site to match your branding or existing website. Our patent pending feature lets you receive order alerts via your web browser, without having to install any special software or device. We have added many features that will make it convenient and easy for your tech-savvy customers to order food or request dining in reservations. We have also included ways for you to
